COVID-19 has its implications on all activities and scheduled plans. To alleviate the difficulties and uncertainty the authors might face in their attempt to participate in APSIPA ASC 2020, we introduce suitable scenarios to alleviate this problem.

- Regular sessions and presentations will be scheduled and held at the conference venue, similar to standard conferences.
- In case none of the authors can attend the conference, pre-recorded presentations will be presented at the scheduled sessions to the audience attending the conference.
- Accepted papers in any of the physical and virtual scenarios are equally legitimate and eligible for publication in IEEE Xplore and conference publications.
- Accepted papers presented in any of the above scenarios are eligible to be equally nominated for the best papers and other APSIPA awards.
- Detailed information will be distributed to all authors of the accepted papers on the way and timing of uploading the pre-recorded presentations.
